Brands Design
Logos

Creating a brand design its a essential element for any business. Can be a complicated task, the research, brainstorming, colors, fonts, integration of elements with text, the back and foward with the client but in the end we always find the right solution, that logo that speak for themself and make the company looks profesional.

Programs used: Illustrator | Photoshop

Backlit Design
Education Event

The company was ready to make a presentation in a huge education event and they want to impress! Say no more! we start to implement all students from all ages and inclusive in all aspects. Using the brands colors and highlighting the A logo. Was a very fun project and results speak by themselves.

Programs used: Illustrator | Photoshop

Video Intro
Storyboard

This video intro was for Language for K grade. We already have some characters for this project ready, my idea was to insert those characters inside a car and create this landscape where you see the car going thru all the letters simulating like all the kids leaning the basics letters from this lesson.

Programs used: Illustrator | After Effects

Articles
Magazine Style

The company have some cool stories that want to kids to read and we need a little help to make it more visual and interesting at the same time. I suggest to make them a magazine style working with text hierarchy, smooth transition between images and fonts that match with the topics.

Programs used: Illustrator | Indesign

SOMETHING WILD

by A. J. Sterkel

The two ice cream cones Henry bought from the street vendor had been in his hands for less than a minute, and already rivulets of vanilla were flowing over his fingers and trickling down his arms. Ice cream dripped off his elbows and splattered the narrow strip of dirt between the train tracks and a thirsty cornfield. The circus train sitting on the tracks offered no shade.

Henry slowed as he moved through the c... near the train. The people hoped to catch... attraction without paying to watch the s... father, the stock market crash had taken... people still had plenty of curiosity. Every... into a station, a crowd was there to meet... them from the window of the luxury trai... father, the circus's owner.

A BEAUTIFUL AND USEFUL GLOW
The Magic of Bioluminescence

Have you ever seen fireflies or lightning bugs twinkling on a summer night? What makes them glow? It's not fairy dust or tiny battery packs. It's a natural process with a long name: *bioluminescence*.

Bioluminescence is an organism's ability to give off its own light. Plants, animals, and bacteria all can be bioluminescent. Most of these glowing organisms live in the deepest, darkest ocean. However, some shine their light on land.

Fireflies, also called lightning bugs, are the most common bioluminescent animal outside the ocean. A firefly glows even as a larva, the wormlike form a firefly takes before growing its wings. That early shine has earned it yet another name: glowworm. Other glowing land animals include a particular species of snail, click beetles, and some kinds of flies, centipedes, and millipedes.

In the plant world, some mushrooms and other fungi are bioluminescent. One is called the jack o'lantern mushroom. That is a fitting name for something that is orange like a pumpkin and glows. However, this mushroom is more of a trick than a treat. It is poisonous and would make you quite sick if you ate it. The jack o'lantern mushroom grows on tree roots and decaying stumps.

CHAPTER 4
TRIALS AND PUNISHMENTS

A pirate's life was full of danger. To buy food and weapons, pirates would capture ships and seize the gold and other treasure on board. Of course, trying to board another ship meant a dangerous fight. However, even daily life could be deadly for a pirate since a ship could run out of food and water before the next target was spotted.

Any pirate also lived with the daily threat of capture by authorities. Piracy was illegal around the world, and pirates who were caught by government soldiers usually faced a death sentence. Pirate... ... ... ime to imagine what it would ... ... ourt for piracy. In fact, one of ... ... ays of passing time onboard ... ...ock trials.

Games Animations
Lottie Animations

The developers in our team create interactive games test that help kids to learn. We create the design of the game flow and in the end screen have a cute animation celebrating you pass the test. I use illustrator to create the whole set of vectors and make the final animation in After Effects, then export to .Json file that way the developers can integrated in the game.

Programs used: Illustrator | After Effects | Lottie Extension
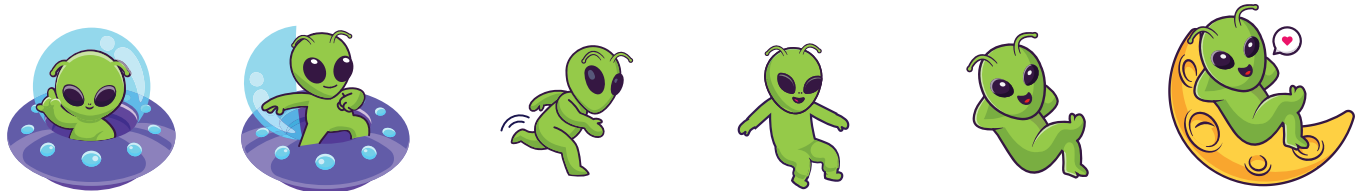

Images
Images for Lesson

The creating of images are a vital part of education. Using visual images help the brain to process the information better. Mainly we use Illustrator to edit any of those vectors graphics. Photoshop and AI when is need it.

Programs used: Illustrator | Photoshop | AI Firefly
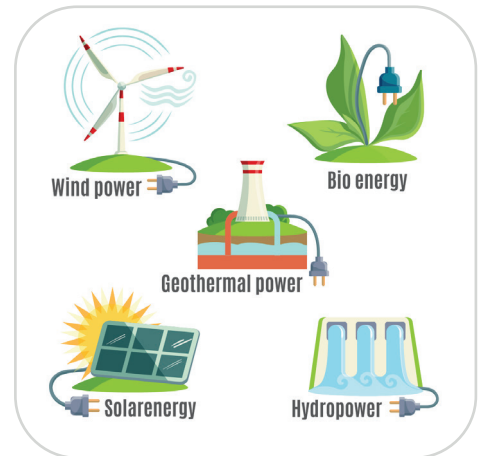

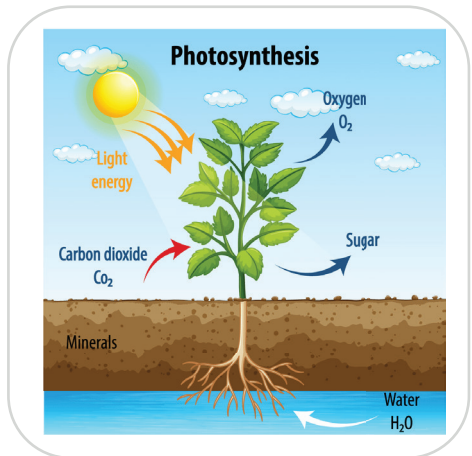

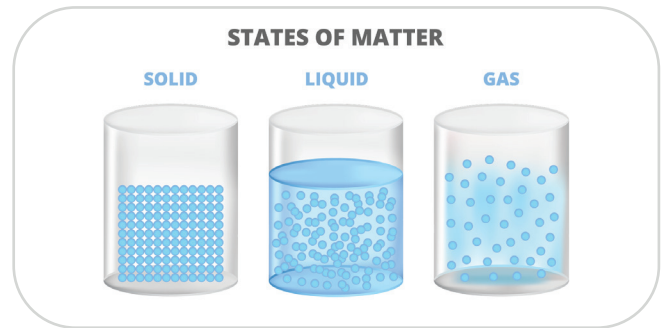

Worksheets
and Interactive PDF

Alignment, style and space are very important part of the creation of Worksheets. Using Indesign to create a uniform structure and Ilustrator for some vector graphics. We use Acrobat Pro to create interactive PDF where the students can write in same pdf and not need to print them.

Programs used: Indesign | Illustrator | Acrobat Pro

My Own Invention

Do you have what it takes to be an inventor? Use what you have learned to complete the activity below. Think of your own invention that can help solve a real-life problem. Write down the problem in the **Problem** box. Next, create an invention that will solve that problem. Draw your invention in the **Invention** box. Then write a complete sentence to answer the question in the last box.

Problem	Invention

How does your invention solv

Mental Math: Addition and Multiplication

Name: _____ Date: _____

Use mental math to solve the addition and multiplication problems below. Use the sums and products to help you solve the riddle!

Example

Solve the multiplication problems using mental math.

$10 \times 5 =$ ⟶ 50

Solve the addition problems by breaking the numbers down to find friendly numbers.

$324 + 52 =$ ⟶ 376

300+0
20+50
4+2

the blanks that match the sums and y not be used.

$8 \times 5 =$ 40

A

$325 + 65 =$ 390

300+ 0
20 + 60 +10
5 + 5

S

Guided Lesson Notes

Name: _____ Date: _____

Working Safely in Science

Directions: Complete this study guide as you move through the lesson. By taking notes, you are more likely to remember what you are learning. The completed study guide can be used to complete practice activities and to prepare for quizzes and exams. Be sure to save each study guide so you can access it when you need it.

Essential Vocabulary

field investigation	Safety data sheet (SDS)

Science Safety Guidelines

1. What is the number one rule for maintaining personal safety when conducting a science investigation?

Characters
Crypto NFT

Long time ago you possible remember to world was into the NFT world.
One Vision is a NFT collection with a super creative and fun characters from real world and imaginary, they all have in common one eye=one vision.
